Rolling Pins

Summers Brothers offers a wide variety of traditional and speciality rolling pins. Each rolling pin is made of solid New England hard wood, hand tooled by Maine craftsmen with a history of producing the finest wood products available since 1900.

Traditional rolling pins are of solid piece construction, machine sanded for smoothness with a natural non-stick finish. Pin handles are turned and grooved for comfort and are attached with a steel center rod, with E-Z glide bearings for years of use. All handles have a clear varnish finish. They can also be made in a variety of other colors. Ask about color availability when ordering.
